ABOUT US

A major manufacturer of swimming pools and enclosures in Europe

- ➔ A traditional Czech family company – on the market since 1990
- ➔ 30 000 pools and 90 000 enclosures assembled and installed in the ground
- ➔ Sold in 70 countries around the world
- ➔ 450 highly-qualified personnel
- ➔ 1,500 m² development and design centre
- ➔ 99,000 m² of production and storage areas
- ➔ Precise quality control
- ➔ High-capacity powder paint shop in Central Europe with modern Decoral technology
- ➔ Selected products and manufacturing processes are protected by utility models and awarded international certificates
- ➔ We have obtained a declaration of conformity for our pool enclosures compliant with the NF P 90-309 (October 2007) standard, issued by the LNE accredited testing laboratory in France.
- ➔ QBIG BENEFIT pools and roofs KLASIK, DALLAS, CASABLANCA INFINITY, MONACO FUTURE are NSF certified.

A photograph of a swimming pool with a glass enclosure, set in a lush garden. The pool is rectangular and filled with clear blue water. The enclosure is made of dark metal frames and clear glass panels, with a curved roof. The pool is surrounded by a grey stone patio. In the background, there is a dense hedge of green bushes and trees, with a forested hillside visible in the distance under a blue sky with light clouds. The text 'SWIMMING POOL SETS' is overlaid on the left side of the image in white, bold, sans-serif font, with a blue geometric background.

SWIMMING POOL SETS

A SWIMMING POOL SET

A pool, enclosure, and technology in one!

Get one of our popular pool sets to benefit from a high-quality pool, an enclosure and all the necessary pool technology in a technology shaft or wall.

Choose from over **400 different combinations!**

SWIMMING POOL	TECHNOLOGY	ENCLOSURES
The heart of your water fun	The motor which drives your pool	Your pool's coat

SWIMMING POOLS

WHY CHOOSE AN ALBIXON POOL?

- ➔ Your guide from pool selection to commissioning
- ➔ Wide range of pool options
- ➔ Overflow and skimmer pools
- ➔ Made in the Czech Republic
- ➔ High-quality materials ALBISTONE® and POLYSTONE®
- ➔ Intelligent pool technology control
- ➔ Economical water treatment
- ➔ Simple maintenance, easy winterizing and energy savings
- ➔ Modern design

QBIG BENEFIT SERIES POOLS

Introducing our pool solution

What do the BENEFIT pools provide?

-  Faster construction work? Very much so!
-  Need to drain the water? Not necessary!
-  Preparation for winter? A piece of cake!
-  More economical operation? Undoubtedly!
-  Easier to maintain? Of course!
-  Our own premium-quality structure. Yes!
-  Significant construction cost savings.

Did you know that...

The BENEFIT pools are provided with an outside thermal structure that is 25 cm thick, which serves after filling with concrete as both a load-bearing and thermal insulating element of the pool. This helps speed up the construction and lets you enjoy your pool as soon as possible.

OVERFLOW POOLS

A clean design, water up to the edge and the feeling of an infinite surface

The X-FLOW grid comes standard with all our QBIG BENEFIT overflow pools.

X-FLOW Grey

X-FLOW White

	STANDARD POOLS – AVAILABLE AS A SET OR INDIVIDUALLY	CUSTOMIZED POOLS – 100% CUSTOM MADE
 DIMENSIONS	3 x 5 m / 3 x 6 m / 3 x 7 m / 3,5 x 7 m / 3 x 8 m / 3,5 x 8 m / 4 x 8 m	Length: 4–9 m/Width: 2–4 m

*Some colours may not be available for all pool sizes.

Did you know that...

Optimized placement of nozzles ensures improved water circulation and significantly reduces the consumption of pool chemicals.

ALBIXON

ALBIXON

QUALITY MATERIALS ARE A MUST

Our swimming pools are manufactured using only premium-quality materials developed specifically for swimming pools

Pools manufactured in blue and grey are made from ALBISTONE®, a material developed by a team of our process engineers and tested in a series of lab tests.

For white pools, we have recently started using the POLYSTONE® P copolymer, a material developed by Röchling Engineering Plastics of Germany for the specific purpose of building pools.

STEPS SHAPES

A range of steps to suit your preferences.

We can make your pool with a square corner to help you utilize the interior of space of any pool size. Whether you are planning fitness swimming, splashing around or relaxing with your family, an ALBIXON pool will always adapt to your needs.

You are the only person who can choose the right steps for your pool. In pools with a depth of 120 cm, there are three steps (four steps when choosing the X-AIR and X-AIR+ versions), while in pools with a depth of 150 cm, there are four steps (five steps when choosing the X-AIR and X-AIR+ versions).

Straight steps over the corner

Straight steps over the corner with a bench*

Rectangular steps*

X-AIR

X-AIR+

AERO steps

Rectangular steps in the corner

*Rectangular steps and straight steps over the corner with a bench are only available for custom pools.

TECHNOLOGY

The polypropylene pool is not self-supporting, so it is necessary to follow all the principles of safe concreting specified in the building preparations documentation.

Filtration

Pump

Heat pump

Swim jet

Salt dispenser

Technology wall

Technology shaft

Pool technology? What is that?

Pool technology is often nicknamed "the motor of the pool". It is not visible at first glance, but it keeps everything in operation. The circulation pump ensures the water circulation. Then there is sand filtration, which removes mechanical impurities from the pool water. This is followed by a water treatment unit, which keeps the pool water in perfect condition.

Did you know that our product specialists are directly involved in the development of BRILIX pool equipment? We guarantee its quality!

What type of water treatment should you choose?

Water treatment helps to keep the pool clear and in great condition, with the crucial parameters in balance. The most popular is salt water treatment using a salt dispenser. From the salt water in the pool, the necessary amount of chlorine is produced in a natural concentration to clean the pool water. Salt dispensers have gained in popularity because they offer abundant options for extensions, such as automatic pH adjustment or smart pool technology control.

Comfort? A top priority!

To make bathing as enjoyable as possible, we have designed swimming pools and technology with an emphasis on ease of operation and maintenance. In general, the more advanced the technology you choose, the less you will have to deal with. Interested in specific options? Just turn to the following pages.

Where will it go?

To simplify selection, we have prepared the most popular pool technology combinations as standard solutions. The first option is a technology wall, which you can place, for example, in a garden house, cellar or garage. The other option is a technology shaft, in the ground immediately next to the pool. It is up to you to choose the option which suits you best.

TECHNOLOGY WALLS

Wide range of placement options

The most convenient access to the pool technology is provided by a technology wall. It can be installed in your garage or garden house. All the pool technology will be protected and easily accessible when necessary.

	BASIC PLUS	ECONOMIC	OXY	UV	STATION

ENCLOSURES

Did you know that...

Safety, savings and an extended season. These and many other advantages are brought to you by an ALBIXON pool enclosure. See for yourself!

WHY AN ALBIXON ENCLOSURE?

A safety and design feature right in your garden

With our extensive experience we can easily guide you through the entire process from the selection of the most suitable model and size, to the purchase and installation of your enclosure.

At ALBIXON, we can satisfy your wide range of wishes. Choose from ultra-low enclosures to walking-height enclosures that are perfect for poolside relaxation.

Treat yourself with an ALBIXON enclosure!

- ➔ Safety for your children and pets
- ➔ Higher water temperature
- ➔ Water purity
- ➔ Pool maintenance time savings
- ➔ Lower your cost of water treatment chemicals
- ➔ Your bathing season extended
- ➔ Protection of the pool from external influences
- ➔ Swimming in bad weather
- ➔ Pool value increased

SYDNEY / SYDNEY CLEAR

Low profile, elegant curves and a modern look

A designer enclosure which we have developed for you in cooperation with automotive designers.

Enclosures – technical details

Durable polycarbonate that is stabilized and protects your pool perfectly.

The enclosure structure is made of highly resistant profiles. They are smoothly rounded and undergo rigorous testing.

The stoppers secure the enclosure against unwanted movement. To increase the safety, we recommend the lockable option.

Rolling on stainless steel encapsulated bearings makes it easy to move the enclosure. Sophisticated hooks prevent the inadvertent lifting of the module.

The Air track can be walked on, is easy to sink into the ground, and provides hidden anchoring elements.

Compact polycarbonate

The most popular variant is the compact polycarbonate PK4 with a thickness of 4 mm. You will love its elegant appearance and perfect transparency. UV protection as standard and available in 2 colours.

Channel polycarbonate

The channel polycarbonate PK8 and PK10 with a thickness of 8 or 10 mm is stable. It has excellent insulation capabilities and provides plenty of privacy when swimming under a roof. UV protection as standard and **available in 2 colours**.

Standard styrene acrylonitrile

An economical option is styrene acrylonitrile SAN with a thickness of 4mm. You will love it especially for its price attractiveness while maintaining a pleasant appearance and high transparency. UV protection as standard and available only in clear.

Profile colours

The enclosure structure is finished with a durable powder paint in our own specialized and certified paint shop. You can choose from a wide range of colours and decors. For standard enclosures, the colours are fixed; for custom-made enclosures you have the following options:

SILVER Basic colours	ANTHRACITE DB 703 Basic colours	PINE Additional colours	CARBON Additional colours	DOUGLAS Additional colours
SHIRE OAK Additional colours	ELM Additional colours	CHESTNUT Additional colours	WALNUT Additional colours	ROVERE Additional colours

RUSTIK Additional colours	MAHAGON Additional colours	WHITE RAL 9016 Additional colours	PREMIUM COLOURS RAL	

Feel free to come and check our sample book.

ALBIXON

ALBIXON

PERGOLAS

Did you know that...

The SKYTRIUM bioclimatic pergola adapts to your individual needs in terms of size, design and location.

Use even after dark

Thanks to the LED lighting, you can use the pergola comfortably at any time of day. You can conveniently control the intensity and start-up by remote control.

Retractable shielding

Electrically operated roller blinds not only provide shade from the sun and privacy, but also give protection against wind, insects and rain.

Variable look

The colour of the structure can be matched to the windows of your house, for example, thanks to the wide choice of colours. We paint in our own certified powder coating paint shop. This way, the pergola fits seamlessly into your home.

Minimalist design

A gutter integrated into the perimeter profile diverts rainwater away through the supporting column.

Protection against the sun and rain

The slats swivel at an angle of up to 140°, thus providing not only protection against the sun and rain, but also resistance to snow loads. In the event of unexpected precipitation, the rain sensor automatically closes the slats. The solid coping of the slats protects the internal components and mechanisms in the pergola against water.

Pure design

The location of the control unit in the column does not disturb the aesthetic impression made by the pergola.

SKYTRIUM

SKYTRIUM

Bioclimatic pergola

The Czech-made SKYTRIUM bioclimatic pergola is an ideal addition to your garden so that you can spend the maximum amount of time outdoors. It combines several functions – **shading, an enclosure** with water drainage and **adjustable ventilation**. Thanks to the unique shape of the roof profiles, the pergola **drains rainwater** when closed, so you can spend your time under it comfortably even in bad weather. The pergola is made of **solid aluminium alloy** with **stainless steel** components, so it is weatherproof. Its minimalist design fits into any garden and improves the impression made by your home.

-  **ventilation** – natural air exchange to achieve a comfortable environment by controlled rotation of the roof blades
-  **protection against the impacts of climate** – sun, rain, snow
-  **shading** – regulating the temperature and intensity of sunlight on the terrace while maintaining light comfort
-  **a functional solution regardless of the cardinal orientation of the garden**
– owing to the variable placement of the roof slats of the GARDA and GARDA PLUS models

 DIMENSIONS	max. 5 760 x 3 720 x 2 850 mm (w x d x h)
 COLOUR	Anthracite DB 703, we paint in our own certified powder coating paint shop
 LOAD	90 kg/m ²
 CONTROLS	electromechanical, remote-controlled
 ACCESSORIES	rain sensor,
 OPTIONAL ACCESSORIES	side roller shutter cover, integrated LED lighting
 ORIENTATION	GARDA: north, east and west facing terraces GARDA PLUS: south facing terraces

Did you know that...

When the roof slats are opened, air starts to flow in the pergola. This lowers the perceived temperature under the pergola, although it is actually the same as in the surrounding environment.

Accessories

For even more comfort under the pergola

1 SHADING

The side and front roller blinds combine the function of shading with protection against the weather and insects, while ensuring privacy. You can control them with the remote control.

SHADING PATTERN – Serge Ferrari premium fabric

- reliable protection against rain
- allows a view out but prevents a view in
- wind-resistant up to 60 km/h
- wide choice of colours

2 LED LIGHTING

Thanks to integrated LED lighting, you can enjoy your pergola at any time of the day or night. You can control the lights and adjust the light intensity comfortably via the remote control.

INNOVATION

Did you know that...

The electric sliding system MOOVER meets high technological demands and, with its universal design, can be used with both new and existing ALBIXON enclosures.

MOOVER

Electric movement for the pool enclosure

We have listened to you, and in cooperation with designers from the automotive industry, we have developed an autonomous electric movement system that you can install with serial enclosures made by ALBIXON. The batteries are charged through the solar panel, or from the mains with a power adapter. Installation of the MOOVER is straight forward.

MOOVER

SPECIFICATIONS

 DIMENSIONS

Length: 1157 mm | Width: 80 mm (without mounting brackets and external connectors) | Width: 110 mm (with mounting brackets) | Height: 163 mm

 WEIGHT

MOOVER weight (incl. battery): 27 kg | Weight of package: 30 kg

 DRIVE

Gearbox type: auger | Motor power: 150 W

X-FLOW GRID

Overflow pool edge

The new and timeless design supports better water circulation and thus its purity.

Thanks to the ease of installation, you no longer have to use any pool trim, couplings or aluminium profiles. You will certainly appreciate the choice of two colours, which will make the X-FLOW overflow grid a design feature in any garden.

Our own overflow grate designed in collaboration with designers from the automotive industry.

X-FLOW Grey

X-FLOW White

A wide-angle photograph of a modern outdoor swimming pool. The pool is rectangular with a curved end, set on a light-colored stone patio. In the background, there is a wooden building with a covered deck area, several lounge chairs on the grass, and a curved shower head on the right. The sky is blue with scattered white clouds.

ACCESSORIES

Did you know that...

We offer heat pumps, filtration equipment or pool chemicals. Furthermore, accessories not requiring installation, such as thermometers and vacuum cleaners. The most popular are devices that help you relax in your pool, reflectors, counterflow, etc.

POOL ACCESSORIES

We make sure that we are a one-stop pool shop for you. That is why you will find a wide range of pool accessories here.

Pool robots and vacuum cleaners

Sand filters

Heat pumps

Pool chemicals

Salt dispensers

Lighting

Filtration pumps

ALBIXON

86

1990

ESTABLISHMENT

Our history dates back to 1990, when the Smetana brothers founded the company under the name ALBION. At that time, no one had any idea that it would later become a leading player in the swimming pool industry throughout Europe.

2011

ALBION → ALBIXON

New company name. And the founders put it simply: "The name Albion referred to England, as we have always admired their business culture and freedom. But people mistook us for other companies, so we added an 'X' to create ALBIXON."

2012

NEW POWDER PAINT SHOP

We open a new powder paint shop with the modern DECORAL line, which allows us to use dozens of colours, designs and patterns, not only for our enclosures, but also for many external customers and their various projects in and outside the Czech Republic.

2023

SKYTRIUM & BERGEN

In line with our new mission and vision, we are launching the SKYTRIUM bioclimatic pergolas and the BERGEN pool terrace enclosure.

1995

SWIMMING POOLS ON THE RISE

ALBION is fully engaged in the production of swimming pools and thanks to the first series pools, the production volumes are growing rapidly. Despite this, demand far exceeds supply, and ambitious plans for the coming years are born in the founders' minds.

2006

BRILIX

Customers no longer want just a pool and an enclosure, but demand a complete pool set from a single supplier. Complexity has become a challenge for us and room for further growth. We responded by creating the BRILIX division, specialising in the sale of our own pool accessories.

2014

SKYTRIUM

We listened to the wishes of our customers and offer a solution connecting gardens and family homes. This is how the SKYTRIUM terrace enclosure was created – the garden and the house.

2022

MOOVER

Introducing MOOVER – the universal solution and autonomous enclosure sliding solution. We listened to our customers and, in cooperation with automotive designers, we developed an electric sliding system with an elegant design that operates pool enclosures at the touch of a button.

1998

PRODUCTION OF ENCLOSURES

We respond to the increasingly urgent demands of our customers and include pool enclosures in our product portfolio. These soon became our flagship product and their popularity is growing every year.

2004

ENCLOSURES IN BOX

We started offering our enclosures in a BOX. The advantages include the considerable savings in the cost of transportation, simple assembly and speed of delivery. We established the IDEALCOVER brand (later renamed ALBIXON BOX) for the export of these enclosures.

2017

QBIG POOLS

We launch a design solution for the QBIG series of swimming pools protected by a utility model. Thanks to the built-in lost formwork on the outside of the pool, we can speed up the construction work, saving our customers' time and money.

2001

POWDER PAINT SHOP

ALBION's first powder paint shop launched in Hořovice significantly supports the production of enclosures and at the same time meets the demand of external customers.

2002

EXPORT

After the first decade of operation, we became a strong player on the Czech market. We then took the opportunity and decided to expand and sell our products abroad, through official B2B partners. First we took it to the neighbouring German market.

2019

SYDNEY & X-FLOW

The year 2019 was full of new achievements reported by our development team. We expand our product portfolio with the elegant and unique SYDNEY serial enclosure system and the luxurious MIAMI customized roofing. We also add our own X-FLOW overflow grid to differentiate ourselves in the market.

2021

3D PRINTING

We are investing in 3D printing and strengthening our development capabilities. Thanks to professional prototypes and our own production of plastic, we are opening the door to further innovations for our customers.
